

**TSCA Domestic Shipment Form**

For all domestic shipments of chemical substances imported or synthesized in a laboratory within the United States, complete this form and include a signed copy with the shipment. This will inform the laboratory receiving the shipment about the precautions for which little or no health, safety or environmental information exists. Also, on the package itself it must be clearly marked “*Contents to Be Used for Research and Development Purposes Only.*”

A copy of this form must be retained in the laboratory.

**Recipient**

The chemical(s) included in this package are for research and development purposes only. Proper standard operating procedures should be used in accordance to the environmental, health, and safety risks it poses (see below). People potentially exposed to this/these material(s) should be trained and well qualified laboratory workers. Health or physical hazards include, but may not be limited to, the information provided or referenced below.

**Shipment Contents**

If it is a mixture, approximate the percentage of each chemical.

Chemical Name	CAS Number (if available)	Quantity

**HEALTH OR PHYSICAL HAZARDS** (Check all that apply)

**Suspected or known hazards include:**

- Flammability (flashpoint [Click or tap here to enter text.](#) )
- Reactivity (is unstable, can detonate or reacts violently with water)
- Corrosivity (ph range: [Click or tap here to enter text.](#))
- Sensitizer
- Oxidizer
- Reproductive hazard
- Pyrophoric, shock-sensitive or other high hazard condition
- Water reactive
- Other: \_\_\_\_\_

**WARNING:** The hazards associated with this material have not been fully evaluated.
